

Dairy Goat Products

Why goat products?

"Goat milk is a pure, wholesome, healthier option that is beneficial to people of all ages. No additives and easier on our body to digest, more people are looking to add it to their family's diet, including us as well. We have raised all 4 of our kids on it starting at a young age, and have expanded to a commercial dairy to allow people in the community to benefit from goats milk as well. "

- Carlyn Shirey

"I was raised on a cow dairy. At the age of 40ish, I started to have trouble with cow milk and ice cream. I had a few pet goats and one of them had more milk than her kids could drink so I had to milk her. To my surprise, that milk did not make me sick! I became a convert. It all started from that one goat. I wanted to help more people enjoy dairy."

- Betty Bronson

"Goat's milk is a great source of nutrition and minerals for not only your skin but also your health!"

- Korban Albrecht

"Goats make milk and cheese - perfect for a family homestead ."

- Carol Peters

"Goats were a life passion after 4-H and a better fit to our life style after the extreme drought of 2002 when we couldn't grow enough hay to support everything ."

- Christine Knoblauch

The American Dairy Goat Association has several goat milk recipes to help start your adventure using this nutritious and tasty product.
