the American Dairy Goat Association Announces Hardware Deployment for ADGA Genetics

Spindale, NC— November 2, 2023 — Today, the American Dairy Goat Association (ADGA) announced that it has provided ADGA Genetics with a server and related software as a part of the cooperative agreement between ADGA and ADGA Genetics. ADGA has provided this new server to ADGA Genetics as a service to the dairy goat industry. The server has been deployed and testing has been underway. It is anticipated that the ADGA Genetics website and programming will be moved and fully functioning on the new server in short time.

"ADGA understands that its members value Gene Derschewitz's contributions to the dairy goat industry through ADGA Genetics. Providing these hardware and software resources will enable continued collaborative effort between ADGA and ADGA Genetics to best serve the dairy industry and support ADGA's mission. We look forward to the continued relationship between ADGA and ADGA Genetics.

Founded in 1904, the American Dairy Goat Association's central purpose and role is defined as:

- To collect, record, and preserve the pedigrees of dairy goats by maintaining herd books and issuing certificates of registration and recordation of dairy goats.
- To provide management, genetic, and other related services to members and the dairy goat industry including the supervision and publication of official milk production records of dairy goats and issuing certificates of production; and
- The promotion and regulation of matters pertaining to the history, publicity, breeding, exhibition, and improvement of dairy goats.
